

Aquarius

The Sign of Unity

Charitable Original Peaceful Visionary

Aquarius represents an everlasting hope and the Water Bearer symbolizes invention! Air signifies a constant and connected flow and Uranus is the planet of awareness and duty! Our dear Aquarian friends are compassionate, gentle, honest and amiable. In their wish for universal peace, they feel for the less fortunate, and they really do care! This air sign is truly testament to its air element.

Aquarians possess a calm and pure magic wrapped in a certain genius! They possess vivid imaginations and steady personas. They can also be very succinct, definitive and rational! They are original acts to say the least, and they sincerely mean well. Aquarians are intuitive, unpredictable, sensitive and generous by nature. Even though they can appear quite reserved at times, they actually make for great company. When inspired, Aquarians can dance to the tune of any new day with ease. Drama and theatrics come naturally it seems, and they can perform well to a crowd.

Aquarians are an independent lot, seemingly happy to appear as the loner at times in their lives. They enjoy their time alone as it often brings them the clarity they so seek, which they often find within meditation. No matter how 'out there' some people may consider their ways, Aquarians are always able to rise above and foresee their destiny. They like to take their own track in life, and do not mind going against traditional avenues! Some are likely to really enjoy going against traditions!

Aquarians do not judge others quickly and are mostly liberal in their thought. If they choose to be outspoken, then they will do it with verve! Their open minds may well bring them knowledge, but they can also be extremely hard to budge. They can also be stubborn in times of stress, which can often lead them to anxiety! Aquarians do not like any one they love being taken for a ride either. They can exude a very powerful and profound presence if their universal cauldron is stirred!

Our thoughtful and kind Aquarian friends make more of a difference than they may realize. They have an inner peace about them. They imagine a bigger picture, and can often be quite spiritual in their outlook. They are passionate when in love and simply splendid to be with! Life is never more beautiful for them than when it is simple! When they are confident, they radiate a divine energy!

Aquarians shine brightest with Good Karma when they are lively, inventive, affectionate and caring!
