

The Dog

The Sign of Faith

Intelligent Loyal Moral Trusting

The honest and forthright Dog brings a smile and warmth to all they meet. They are our adorable defenders who love good company. Always anxious to deliver a perfect life performance, Dogs are truly dutiful to the end. No other zodiac sign keeps a secret like a Dog!

All Dogs require from us is love and a few homely creature comforts. They do not require materialistic goods, as they are quite happy to make the best of what they have. They are unselfish and will put themselves in the firing line for us when they sense danger. Their bark is their best weapon against any possible threats, and they will defend to the end if attacked. Their commitment levels are extraordinary when it comes to protecting those they love!

If startled, this quiet and restful character can bounce into an instantaneous defensive reaction. However, these lively characters can switch back into their crazy and uncontrollable happy zone in no time. It appears that mayhem is often the best form of fun they can create!

Dogs just love outings and are at their best when playful. Anywhere, anytime, they are up for just about anything and love being included as part of the days adventures. When agitated or restless however, Dogs can also nag profusely in order to get the attention they seek. The eyes of the Dog can appear downhearted and even sad, most likely because they are prone to worrying unnecessarily about unimportant things. Dogs like being secure within their own protected environments, and can fret if uncomfortable or lonely. They prefer good company!

The friendly Dog is our most trusting companion and can easily touch our hearts. They are naturally cheery and loving, as well as ultimately faithful companions! Dogs can also be a truly divine and calming influence when we need them to be. They understand us and even appear to feel our sadness and sorrow at times. No wonder they sometimes worry about us! With a little more patience and optimism, their objectivity and integrity should serve them well!

Dogs shine brightest with Good Karma when they are tolerant, sharing, protective and frisky!
