

## Leo

### The Sign of Loyalty

#### Caring Honest Proud Protective

Leo represents a natural and harmonious energy! The Lion symbolizes strength and story! Fire signifies heat, light, warmth, and energy, and the Sun is the most worshipped and significant influence in the history of mankind! Wow! Leo is one of the most gregarious of the western signs and this powerful fire sign is bound to liven things up. Leo's unique charisma alone opens doors to all sorts of opportunities!

Leo's are ruled by the Sun, the core of our solar system, so perhaps they are admired and respected naturally. Whether they actually deserve it or not, they love silver service, and can easily give the impression they should get such star treatment all of the time. This is one very natural regal fire sign!

Leo's carry a particular nobleness within their stride and make for natural leaders. They are also smart, confident and understand the bigger picture in life. When the going gets tough, they stand firm and dig in. They are not scared of a challenge either, no matter how huge a task! They will only retreat if it is the only smart option left! Do not be surprised if your Leo friend is the boss. That's the way they like it! They are hard workers and can act any part required to succeed. They do not waste time or energy, and they are used to getting what they want! They should therefore be very careful what they wish for!

Leo's are generous and friendly to others by nature, sometimes too giving for their own good! Their underlying pride can also be their weakness. Leo's attract crowds easily, so they need to be very cautious of possible undermining influences. They can be manipulated through the compliments they receive. Leo's should also be cautious of representing the wrong purpose. They'll take the glory all right, but the cause may not really be theirs! Attaining goals and praise is only worthwhile when the cause is!

If you break the trust of a Leo, you have just upset the king of the jungle. Expect a lesson from them at some stage down the track. They will remind you of your wrong doings in no uncertain terms when it best suits them. They will not forget, and will likely be silently sad for some time over being let down.

We should never forget that Leos do like to save the day, and it is lucky for us when they do! They are fighters for a good cause and sincerely do mean well. In love, our sexy, elegant, and refined Leo friends can be hopeless romantics. They have a very soft and serene side that needs lots of love and caressing!

Leos shine brightest with Good Karma when they are devoted, passionate, creative or noble!
