#### **Courteous Modest Practical**

Virgo represents a natural and eternal beauty! The Virgin symbolizes an untouched purity! Earth signifies a nurturing nature, and Mercury holds an analytical planetary influence! Virgo is the only sign represented in western astrology by a female. A Virgo's beauty is usually complimented by their unassuming demeanor!

Virgo born people are considered to be clever, curious, and practical. They are also ingenious, diligent, and meticulous. They have an outstanding intellect and can see through any maze. They have an eye for detail which is unsurpassed, perhaps too much so occasionally when they get side tracked! They are brilliant masters of language, and make for exceptional communicators. They are also efficient administrators who need to balance the books. They also present themselves well in both their style and their cheery manner!

This Earth sign is peaceful and calming most of the time. In times of stress however, Virgos may be first to fall ill. They are also liable to procrastinate at times and are prone to over exaggerating a small situation. Virgos should be careful to avoid dramas they do not need. What they should do is move on! They need not be so hard on themselves either! Give them the peaceful surroundings they so seek, and watch a Virgo get things done! Their calming and ethical efforts bring them results every time when they are relaxed!

Virgos actually symbolize so much of the purity that is a part of us all, they cannot help but be the some of the nicest people to have around. Virgos however are very selective when it comes to making new friends and can be quite particular. They do not give their trust easily! They like perfection, nature, and the time to really talk! They offer delightful company, and make great lovers and parents. They give us understanding and compassion when we need it, they know how to keep a secret, and they are great problem solvers! The one thing that is truly significant about Virgos is their earth energy which they spread amongst us all!

Virgos are respectful, stylish, generous, and beautiful! They do have a shy side however, and may not always be comfortable expressing the way they feel within. When in love, Virgo's are affectionate and fun. They are extremely sensuous and always aim for perfection. Just like Mother Earth, Virgos are also pure and capable of great growth and healing processes. A life with one would be ever so caring and sharing!

Virgos shine brightest with Good Karma when they are sensual, composed, caring and thoughtful!
